# Three-step operation to get outputs

1, Enter the list of decoding accuracies

2, Enter the parameters

3, Press this button

Experimental Results

[48 56 60 61 65 69 72 77 80 83 91 93]

Gereral Parameters

Number of Trials — 100

Statistsical Threshold — 0.05

Parameters for i-test

Gamma_0 — 0.5

i — 3

Number of Subjects — 12

Calculate!

Decoding Accuracy (Black bars: each participants, Red bar: mean)

t-test	i-test-one	i-test with i	i-test with i_max
0.0002714	0.1338	0.024351	0.024351 (i=3)
